

Assignment 01

Name :- Saurabh Helwade

Roll No. :- A-31

Case study :-

Before coding of the website, planning is important, students should visit different websites (Min. 5) for the different client projects and note down the evaluation results for these websites, either good website or bad website in following format :-

Sr. No.	Website URL	Purpose of Website	Things liked in the website	Things disliked in the website	Overall evaluation of the website (Good/Bad)
1	https://www.microsoft.com/en-in	Product Based Company	1. Product Information 2. News and Announcements 3. Accessibility 4. Fully Functional 5. Attractive and Responsive Website	1. Design Preferences 2. Slow Load Times 3. Search Functionality	Very Good
2	https://www.amazon.in/	E-Commerce Shopping Website	1. Wide Product Selection 2. Customer Service 3. Convenient Shopping Experience 4. Amazon Prime Video and Music 5. Personalized Recommendations	1. Return Process 2. Search Functionality 3. Privacy Concerns 4. Subscription Services	Good
3	https://blinkit.com/	Online Grocery Delivery	1. Great User Interface 2. Easy to Search grocery items	1. Location traceability	Moderate
4	https://www.iitb.ac.in/	Educational Institution for Engineering	1. Admissions Information 2. Alumni Section 3. Campus Facilities 4. Research Initiatives	1. Lack of Mobile Responsiveness 2. Limited Functionality 3. Ineffective Search Function	Good
5	https://dpcoepune.edu.in/	Engineering College Or Institution	1. Useful for Students who wants to view review about college	1. Outdated Design 2. Technical Issues 3. Lack of Information 4. Poor choice of fonts and colors	Moderate

From the evaluation, students should learn and conclude different website design issues, which should be considered while developing a website.

Conclusion :

In conclusion, the importance of thorough planning before coding a website cannot be overstated. Prior to diving into the development phase, students are strongly encouraged to engage in a comprehensive exploration of existing websites related to different client projects. This involves analyzing a minimum of five websites and documenting their evaluation results. The evaluation should focus on distinguishing between good and bad websites based on various criteria such as design, navigation, functionality, responsiveness, and overall user experience.
